

1 removal of the play field pole heights
2 exception was removed?

3 MR. WEAVER: Well, there was some
4 discussion during the public hearing, and
5 basically, I think some citizens were against
6 such high lights. I think there was some fear
7 there might be light spillage into adjacent
8 residential areas, and the planning commission
9 just decided to remove it.

10 TRUSTEE EKSTROM: So there won't be
11 any lighted fields.

12 MR. SAVOY: Well, no, I think
13 that's an important point. I think what they
14 said is what the intent would be now is to be
15 reviewed on a case-by-case basis. They did
16 not say no lights. What they said is we don't
17 want to have a de facto standard that, you
18 know, that allows whatever the height was 40,
19 45 feet. But they acknowledge that there
20 would be need for lighting on clearly some
21 ball fields. That's where the hours of
22 operation came in. We were trying to
23 establish some standards. The commission said
24 that's just too difficult. We'll deal with it

1 on a case-by-case basis.

2 That's their recommendation.
3 Obviously, you can make up your own mind.

4 TRUSTEE KIZIOR: My recommendation
5 to the board and my personal opinion is that
6 there are no lights on the ball field or
7 soccer field as long as I'm the head of
8 landscaping/parks and recreation.

9 PRESIDENT GIFFORD: Joel, you've
10 got a question.

11 TRUSTEE ROTTER: I've got a couple
12 of them, I guess.

13 I just got this 6:15, this
14 document that Pat referenced. So can this --
15 This is a modification of what we have in the
16 packet.

17 MR. SAVOY: Yeah. Michael can go
18 through in detail the changes. There are not
19 many significant changes.

20 TRUSTEE EKSTROM: You want them?
21 I've got them. I've got them all marked up.

22 TRUSTEE ROTTER: Let me ask a
23 couple of questions about them.

24 You removed the height

1 structure, the height limitations.

2 MR. SAVOY: Yeah.

3 TRUSTEE ROTTER: I have a twofold
4 question about that, and I look at it because
5 of Charlie Brown is where I see the concern
6 that I have. The ball field backs very close
7 to the property line to the west. Is the
8 intent of the setback, as we read them here,
9 is to not to have structures such as ball
10 fields or soccer goals or any other structure
11 near the property line within the setback
12 rules that you now specify?

13 MR. SAVOY: No. The structures I
14 referred to are really the buildings or
15 principal structures like those things on Vehe
16 Farm, not the back stops or lighting
17 fixtures I don't consider those the way we
18 typically define a structure.

19 TRUSTEE ROTTER: The reason why I
20 make that it's not a problem at Town Center,
21 but it is if we administer these and if the
22 parks that are in the residential community
23 were used. Since I'm in a lot of those parks
24 as an umpire a lot, not in Deer Park but in

1 other places, one of the biggest offenses that
2 communities complain about is the ball fields
3 are so close to the residential homes that
4 when balls go errant or soccer balls go
5 errant, they're in private residences.

6 My concern that I see here is
7 I don't think that these setbacks and the
8 guidelines we have here take those things into
9 consideration. Now, if we're not really going
10 to be using them, like I'm not aware that
11 Charlie Brown's ball field gets used very
12 much, but if it were being used in a
13 competitive manner, it would be offensive to
14 the community and residents around that ball
15 field. I don't know what it's like in some of
16 the other parks, but I think we should take
17 that in to consideration. Are we really going
18 to use these ball fields in some of these
19 other facilities in the parks, that's my
20 concern. Because I know what happens -- I
21 know it happens in Lake Zurich, as an example,
22 because I'm there on Sunday morning a lot.

23 PRESIDENT GIFFORD: Dave, do you
24 foresee any competitive activity?

1 I know they're used a lot for
2 practices.

3 TRUSTEE KIZIOR: Right now as it
4 stands the two places most optimal for
5 competitive is Vehe Farm and the Town Center.
6 It is important because of the benefits that
7 derive the residents to have someplace where
8 there could be competitive games.

9 TRUSTEE ROTTER: Charlie Brown, I
10 think, is the only one that has anything like
11 that.

12 TRUSTEE KIZIOR: Possibly, but only
13 for eight years and under soccer.

14 TRUSTEE ROTTER: That ball field
15 structure there, that's not being used --

16 TRUSTEE KIZIOR: That's usually used
17 for practice.

18 TRUSTEE ROTTER: The only other
19 comment is I know that when I look at Vehe I
20 don't see that as a problem because there's a
21 buffer zone there with some rough tree areas.
22 So that shouldn't get into the residential
23 areas. I just call it out in the event
24 there's anything planned to use those in any

1 other manner.

2 MR. SAVOY: Well, I think there's
3 also the underlying understanding of how
4 these -- this would work is that -- which kind
5 of underlines the spirit of why we're doing
6 this. In essence, we kind of had this
7 discussion with regard to the fence issue. Is
8 that no decision will be made, you know,
9 without public scrutiny. It will be done
10 before the board. It will be a decision you
11 will make with regard to how it uses it. So
12 the public will be informed through the normal
13 process.

14 TRUSTEE ROTTER: Your updated memo
15 changes the fence height not to exceed six
16 feet.

17 MR. SAVOY: That was the plan
18 commission's recommendation.

19 TRUSTEE ROTTER: Which is what I
20 recall is the side fence.

21 TRUSTEE EKSTROM: See, I have to go
22 back and check. I could have sworn it was
23 three and four was the fence height, but I
24 could be wrong. I mean, my memory could be

1 faulty.

2 TRUSTEE ROTTER: Our fence ordinance
3 does say that -- The fence ordinance requires
4 a percentage of -- what's the proper word that
5 is used?

6 TRUSTEE EKSTROM: Opaque.

7 TRUSTEE ROTTER: And this one
8 doesn't say that. That would be the only
9 thing that I would suggest, and I think in the
10 spirit of that, that we include some of
11 terminology, i.e., opaque as part of the
12 fence --

13 TRUSTEE EKSTROM: Or you say
14 something that it complies with the current
15 fence ordinance.

16 PRESIDENT GIFFORD: Well, then
17 there's a question there because for example
18 ball fields, a lot of times you have
19 chain-link fences, back stops.

20 TRUSTEE ROTTER: They don't use
21 chain-link fences anywhere else anymore. It's
22 too dangerous to run into. They don't --
23 They'll use break-away fences now.

24 PRESIDENT GIFFORD: Dave?

1 TRUSTEE KIZIOR: Well, the Town
2 Center is five years old. Maybe those chain
3 standards changed since then.

4 TRUSTEE ROTTER: Well, what they do
5 now is they pad them. They pad the metal and
6 where the chain links come together at the
7 top, those are padded and there's a round
8 top -- round piece that goes across the top.
9 I'm not sure about it. You might look into
10 it. This is probably a question that nobody
11 has ever thought of, and I'm thinking of it
12 right now. I would say that there's a
13 liability on the village if we provide
14 facilities that someone could run into if
15 their forehead were to hit that metal.

16 PRESIDENT GIFFORD: Well, I think
17 that would be dealt with on a case-by-case
18 basis.

19 Kon, isn't that what the plan
20 commission is looking at when we're putting
21 new ball fields together.

22 MR. SAVOY: Well, with regard to
23 several of these standards: the lighting
24 issue, the hours of operation, there's no

1 lights if that's your decision. That answers
2 that question, it puts it to bed; but I don't
3 know if that would apply to the parks -- the
4 new parks by the fire station.

5 TRUSTEE KIZIOR: Oh, definitely.

6 MR. SAVOY: As well?

7 TRUSTEE KIZIOR: Oh, yeah.

8 MR. SAVOY: There is several issues
9 like that would be somewhat determined based
10 on a case-by-case basis.

11 PRESIDENT GIFFORD: Okay.

12 Case-by-case basis we're looking at, okay.

13 If there's no other questions,
14 what I would like to do is get a motion for
15 the village attorney to prepare an ordinance.
16 The section would be 158 of the zoning
17 ordinance taking in to consideration A and B.

18 I need a motion.

19 TRUSTEE THRUN: So moved.

20 PRESIDENT GIFFORD: Second?

21 TRUSTEE PLAUTZ: Second. And
22 that's for both of them, the sign and the
23 public lands, because that's both in the same
24 section.

1 PRESIDENT GIFFORD: Yes.

2 Moved and seconded.

3 All in favor?

4 (Chorus of ayes.)

5 PRESIDENT GIFFORD: Opposed?

6 (No response.)

7 PRESIDENT GIFFORD: Motion carries.

8 The next item is item number
9 nine, the proposed agreement between the
10 village and Health World.

11 ATTORNEY KELLER: Pursuant to the
12 board's direction at the last meeting, I've
13 had several conversations with Mr. Peter
14 Rusin, the president of Health World
15 organization, and as a result of those
16 conversations I bring to you for your
17 consideration the proposed contract that you
18 have received in your packet.

19 The -- I'll tell you that my
20 priority in discussing this matter -- and I
21 was in contact with the farm foundation
22 officers throughout the whole process.

23 My priority in discussing this
24 matter was to get some compensation to the

1 village for the use of the facility, and
2 Health World has agreed to pay the village a
3 fee of \$5.00 for every person who registers to
4 participate in one of the foundation-- one of
5 its programs. That was, as I say, the major
6 focus -- a major focus of our discussions. My
7 understanding is that -- and we have a
8 representative from the foundation here, this
9 evening -- I'm sorry, Health World, who can
10 tell you more about their operations than I
11 can.

12 My understanding is that
13 the -- Health World charges a registration fee
14 depending on the length of the program of
15 somewhere in the range of 25 to 50 dollars per
16 kid for participation in one of these
17 programs. And so taking \$5.00 out of that fee
18 for the village is a pretty good slice of the
19 fee coming to the Village for a fee.

20 The other -- Another issue was
21 the term of the agreement, how long this
22 contract was going to run. You recall that
23 Health World had originally proposed to the
24 village a contract for five years. In

1 discussing this with the -- with Health World,
2 it became clear that they are anxious to see
3 the program succeed, of course, and felt that
4 it might take a year or so for the program to
5 really catch the public's attention and to get
6 rolling. And they -- While I proposed a
7 three-year contract, they had asked for four.
8 So the contract as it's being presented to you
9 runs through the end of the summer in 2010 or
10 four summers.

11 The other points deal with
12 liability and the exhibits. You have a list
13 of the exhibits that the farm foundation hopes
14 to acquire from the Health World Foundation.
15 There have been some minor modifications to
16 the list that was actually attached to your
17 copy of the contract, and the farm foundation
18 can discuss that in more detail with you this
19 evening.

20 I think my suggestion is that
21 we hear from the representative from Health
22 World Foundation so that you have a better
23 understanding of what exactly it is that
24 they're proposing to use -- how they're

1 proposing to use the facility.

2 MS. ZYLKE: Thank you for inviting
3 me here to your meeting this evening.

4 My name is Kym Zylke, and I'm
5 the Executive Vice President of Health World.
6 Many of you might be familiar with our
7 facility. We're located in Barrington. We
8 had an 85,000 square foot museum dedicated to
9 health and safety education for children.
10 This past summer we closed our doors and we
11 initiated our outreach education program which
12 had far exceeded our expectation to serve
13 schools and community groups by providing this
14 information in a format that children will
15 embrace, make it interesting and unique to a
16 learning environment. One of those component
17 that we always offered at the museum was our
18 summer camp program which had quite a
19 following. We saw children from Hawthorn
20 Woods, Barrington, Palatine, Lake Zurich made
21 a huge percentage of the students that we drew
22 from. We did see students and children from
23 Roselle and Bloomingdale, whose parents might
24 possibly work close to Health World.

1 What we're hoping to do is
2 transfer some of our assets. There's a cow
3 that has been named Bessie, information on
4 where dairy comes from and how it's good for
5 your body. We work with the Dairy Council,
6 the Midwest Dairy Council to provide ongoing
7 information and updates as part of our
8 curriculum. We also have an environmental
9 programs.

10 What we would like to do is
11 present some of these exhibits in the form of
12 a donation to the Vehe Farm Foundation so that
13 students can still access the interactive
14 exhibits that we had created and then bring
15 our camp programs to Vehe Farm. We would do
16 that over nine weeks. Each week is equivalent
17 to what we call one session. They would
18 typically run in the mornings, quite possibly
19 in the afternoon. We would enroll up to 60
20 students per session. Those 60 students would
21 make up three separate camps. The younger
22 camps would have about 20 students in them or
23 children as up to 30 or 40 to make up that
24 number of 60. The age groups that we present

1 programs to range from four to five year olds,
2 minimum of eight students per camp, a maximum
3 of 15; our explore camp which is ages six
4 through eight; and our enrichment camp which
5 is nine through twelve. These would be
6 facilitated by Health World education staff
7 members, most of which have their Master's in
8 Health Education or are certified teachers.
9 Our camp leader is a registered dietitian.
10 She's been with Health World for over 13
11 years. And we feel that this would truly be a
12 win/win for both the community and Health
13 World by bringing the camp into your
14 community.

15 PRESIDENT GIFFORD: Anyone have
16 any -- Will you be able to answer some
17 questions if the board has some?

18 MS. ZYLKE: Sure.

19 TRUSTEE EKSTROM: My only questions
20 are more related to the contract more than
21 your facility, so I'm going to address them.

22 TRUSTEE PLAUTZ: I have one.

23 PRESIDENT GIFFORD: Go ahead.

24 TRUSTEE PLAUTZ: I was worried If

1 you have the 60 students -- I think you
2 probably have to explain to me. Say like it
3 starts at 9:00 a.m. Is there a possibility
4 that 40 to 60 cars would be dropping kids off
5 at that time?

6 MS. ZYLKE: Yes, there is a
7 possibility; however, we had implemented a
8 drop-off procedure at Health World We run
9 these camps at our facility for close to ten
10 years now.

11 TRUSTEE PLAUTZ: So explain how you
12 did it there and what you think can transfer
13 to the new way.

14 MS. ZYLKE: We're anticipating our
15 entire procedure and protocol will transfer to
16 Vehe Farm. I've made several visits out to
17 the farm, and we would have the cars loop
18 through. So the drop off procedures for the
19 safety of the children, they will exit the car
20 closest to the entrance of the building. When
21 students enroll in our camps, parents are
22 given a coded card that they keep in the
23 windshield of their vehicle. We have staff
24 members chaperoning the students at all

1 times. The students will not be out by the
2 parking lot without a staff member. Usually
3 we keep them in small groups and as the cars
4 pull up, the parent signs them out, they get
5 in the car, and they leave. So we're
6 eliminating the need for siblings to be
7 getting out of the car and walking into the
8 farm or the barn to get their child or
9 sibling, and we're keeping everybody in the
10 vehicle and moving them through.

11 So drop off usually starts
12 about ten to 15 minutes before camp starts,
13 and some campers arrive five minutes when camp
14 should have started. So there will be
15 vehicles coming through the parking lot, but
16 our protocol will have them in and out rather
17 quickly.

18 We used to see about 13 to 20
19 buses in our parking lot, and we would be able
20 to have those students unload and get them
21 through our orientation process at the museum
22 in a matter of 25 minutes from start to
23 finish, as the buses started pulling up. So
24 the camping -- the campers in their own

1 vehicles, the buses -- We will have no buses,
2 however, at Vehe Farm. It will all be parents
3 dropping off or guardians dropping them off.

4 TRUSTEE PLAUTZ: Now, first of all,
5 I'm familiar with preschool and being very
6 careful of what's -- what little child goes
7 where, so that I'm glad you're doing.

8 My thought was that -- Okay.
9 Some people will end up getting in a car pool,
10 so possibly 40 cars whether it's going or
11 coming if they're all letting out at the same
12 time. I'm worried about on Cuba there, there
13 is going to -- if they're trying to make the
14 left-hand turn, there is going to be some kind
15 of back ups. So whether we're going to have
16 to ask the policemen can you come over at such
17 and such time, if this is a possibility to ask
18 a policeman to help direct so people could
19 make their left-hand turn. I think there's --
20 I was worried that some of those cars would
21 be -- I guess were stacking up on Cuba,
22 itself. I think you can get the idea.

23 PRESIDENT GIFFORD: I think that's
24 understandable.

1 TRUSTEE PLAUTZ: So what do we do?

2 PRESIDENT GIFFORD: One of the
3 things you may want to look at is cars coming
4 in from the left making a left-hand turn in
5 all cars egress or exiting the property you
6 may want to put in some statute that they can
7 only make a right-hand turn out that way we're
8 not having people crossing and turning in
9 front of each other.

10 This camp starts at what time,
11 ten o'clock?

12 MS. ZYLKE: Nine o'clock in the
13 morning.

14 PRESIDENT GIFFORD: So that's
15 normally outside the normal quote/unquote rush
16 hour, if there is such a thing nowadays.

17 What time does the camp
18 normally end?

19 MS. ZYLKE: The morning session
20 would run about two-and-half hours, so 11:30.

21 PRESIDENT GIFFORD: Okay. And then
22 the afternoon session?

23 MS. ZYLKE: Afternoon session would
24 start about 12:00.

1 PRESIDENT GIFFORD: And they're
2 over around 2:30, three o'clock then?

3 MS. ZYLKE: Right.

4 We do provide parents with an
5 orientation as to how our pick-up- and drop-
6 off procedure is being implemented. So any
7 recommendations that the board would have or
8 the Vehe Farm Foundation, we would be happy to
9 of course implement and work with you as to
10 what would work best and what's in the best
11 interest as far as safety. Most definitely.

12 TRUSTEE PLAUTZ: Well, I can imagine
13 that I would, you know, love to have a traffic
14 direction there. I do realize there is so
15 many people and when you have to go out of
16 your way, it's no fun either. You know, say
17 like if we limited it only to right turns, you
18 have -- you have to go out of your way. So
19 whether we inconvenience the driver, I -- I
20 don't know if there would be an extra police
21 charge. Do we wait and see? Maybe we should
22 double check what the police department thinks
23 about my question, double check on that, and
24 then we could brainstorm a little bit more.

1 PRESIDENT GIFFORD: Jim, can you
2 talk to Chief Falali and explain the situation
3 to him and maybe he could get in touch with --

4 ADMINISTRATOR CONNORS: Yeah, I
5 could do that. Generally, you try to avoid
6 those type of situations. They could stay or
7 have people coming and going.

8 TRUSTEE PLAUTZ: Staggering would be
9 great.

10 ADMINISTRATOR CONNORS: I'm just
11 saying the last resort you want a police
12 officer out there directing traffic.

13 PRESIDENT GIFFORD: I'm not saying
14 get a police officer. I'm saying just talk to
15 him and see if he has any recommendations.

16 ADMINISTRATOR CONNORS: Sure.
17 Staggering.

18 MS. ZYLKE: Staggering start times
19 for camps, we haven't launched anything, so we
20 have a clean slate.

21 TRUSTEE PLAUTZ: Well, I thought it
22 was maybe it was brother and sister going and
23 you know so one is in one group, but maybe
24 they only have to wait there 15 minutes.

1 TRUSTEE EKSTROM: I would stagger
2 more so than get --

3 TRUSTEE ROTTER: Excuse me, I have a
4 question here.

5 Did you say that the afternoon
6 session starts at noon?

7 MS. ZYLKE: The afternoon session
8 would start about noon or 12:30, yeah.

9 TRUSTEE ROTTER: I was wondering
10 there will be no children there for lunch,
11 just the staff members.?

12 MS. ZYLKE: That's correct. No
13 lunch.

14 TRUSTEE ROTTER: It's just that it
15 seems to me I would hope that traffic would be
16 clear between the 11:30 pick up and the noon.
17 It seems to me stagger that a little later.

18 The other comment is: I
19 believe, if I recall, I didn't look it up, but
20 I'm going by recall, I believe that in the
21 guidelines that we have for Vehe that we had a
22 provision in there that called for a safety
23 officer of some sort. I don't know if that
24 was the right terminology, but it seemed to me

1 there was something like that that whoever was
2 going to rent the facility was going to be
3 required to have to pay for that.

4 MS. EKSTROM: Uh-huh. There was
5 something.

6 PRESIDENT GIFFORD: Wasn't that if
7 there was alcohol involved?

8 TRUSTEE EKSTROM: No.

9 TRUSTEE ROTTER: I don't think it
10 did. I don't think it had to do with
11 alcohol. I think it had to do with the size
12 of the group. And if we're looking here at 40
13 to 60 cars potentially at one session, I would
14 think that for that short period of time that
15 might require that.

16 TRUSTEE PLAUTZ: Do the authors of
17 that notebook recall anything?

18 TRUSTEE EKSTROM: Well, I recall it
19 only because I had an objection to it because
20 I was thinking that people having to pay for a
21 safety officer if they wanted to rent out the
22 facility would make it so that they wouldn't
23 want to rent out the facility.

24 PRESIDENT GIFFORD: We can double

1 check that, but let Pat --

2 TRUSTEE KIZIOR: If I could just
3 make another point. Maybe one of these
4 teachers is -- can serve a dual role as a
5 safety officer if that's a requirement.

6 PRESIDENT GIFFORD: Pat?

7 MS. WINKLEMAN: The requirement for
8 a police officer being at an event at the barn
9 was if liquor was being served. One officer
10 up to 75 people, two officers for 75 or more
11 people. That was the only requirement for
12 having an officer on site.

13 PRESIDENT GIFFORD: Okay.

14 Any other questions of Kym?

15 TRUSTEE KIZIOR: I had a question
16 regarding the outdoor activities.

17 A lot of your activities are
18 going to be centered around nature at the Vehe
19 Farm, but we also had provisions to put a tot
20 lot in place, but right now we don't have any
21 firm guidelines on when that's going to
22 exist.

23 Is that going to be something
24 that your classes are going to use or is that

1 just going to be as intended originally for
2 the Vehe Farm for any other guests that might
3 come to the premises?

4 MS. ZYLKE: If I'm understanding
5 your question correctly, that is not an
6 amenity that Health World was counting on. If
7 it was an amenity that would be made available
8 to enhance our programs, that would be
9 wonderful.

10 TRUSTEE KIZIOR: But it isn't a set
11 requirement?

12 MS. ZYLKE: No.

13 TRUSTEE EKSTROM: I do have one
14 question and that is related to Bessie. I've
15 talked to few residents that have sent their
16 children to Health Word and Bessie has never
17 been functional whenever they've attended. I
18 haven't talked to very many.

19 Is Bessie functional, and how
20 much does it cost to maintain and keep her
21 functional?

22 MS. ZYLKE: Depending on when
23 they -- I actually talked with Pat about this
24 last time I visited the farm. Depending on

1 when they visited Health World, Bessie was
2 never -- wasn't plumbed originally with its
3 own plumbing and drained when it was in our
4 warm tunnel Us and Stuff area. As of the last
5 two years it has been relocated in Us and
6 Stuff, and we actually have plumbing going to
7 Bessie and its own drain, and it has not been
8 an issue as far as maintenance whatsoever.
9 It's working right now at Health World.

10 TRUSTEE EKSTROM: So has that been
11 factored in that we have to do the extra
12 plumbing? What is the expense of getting
13 Bessie functional in the barn, has anybody
14 considered that?

15 MS. BRIDGE: At this point we're
16 not anticipating -- The type of plumbing that
17 we would create is down the road because we
18 have not factored in any type of cost of doing
19 plumbing similar to what they did at Health
20 World. What we are exploring with Health
21 World's technical assistant is the idea of
22 being able to freshly put water in and have
23 the kids experience the actual milking of the
24 cow. So there is a manual filling of the

1 reservoir, not an actual pump reservoir.

2 TRUSTEE EKSTROM: So there is no --

3 MS. BRIDGE: And then down the road
4 if we really wanted to plumb her, then that
5 would be something for the village board to
6 consider.

7 TRUSTEE EKSTROM: So there's no
8 expected expenditure from the village planned
9 for Bessie

10 MS. BRIDGE: Not now.

11 PRESIDENT GIFFORD: Any other
12 questions?

13 TRUSTEE PLAUTZ: Yes, I do.

14 Now, since you've -- I don't
15 know -- When you were in -- I think you were
16 in the town of Barrington, right?

17 MS. ZYLKE: Uh-huh.

18 TRUSTEE PLAUTZ: Did you give -- One
19 of our citizens wondered would there be
20 priority registration for the citizens, the
21 kids of our town?

22 MS. ZYLKE: Priority registration?

23 TRUSTEE PLAUTZ: Well, I didn't know
24 if you had done it for the Barrington people.

1 That, you know, that -- say like -- It would
2 be wonderful if it was wildly successful and
3 then say Deer Park residents get first crack.

4 MS. ZYLKE: To be honest with you
5 we haven't done anything like that in the
6 past. If there was an interest in giving the
7 citizens of Deer Park priority registration,
8 we could mail their registration packets out
9 or disseminate those. Typically, Health World
10 disseminates its camp information through the
11 schools. We follow the protocol. It's
12 approved information that goes in the take-
13 home folders. So we could arrange to drop
14 those in the Village of Deer Park maybe a few
15 days before or a week before the rest of them
16 would be mailed or distributed, but we have
17 not done that in the past.

18 TRUSTEE PLAUTZ: Okay. I think
19 that sounds like a very good idea to follow
20 that, and I realize that our kids are in
21 several different schools. So naturally some
22 Lake Zurich or some Barrington kids are going
23 to have this advantage, but I think that
24 that's a minimum, and I appreciate that.

1 PRESIDENT GIFFORD: Howard, do you
2 have a question?

3 TRUSTEE THRUN: So Paul, we're
4 looking here for approval of the ordinance?

5 ATTORNEY KELLER: The contract.

6 TRUSTEE THRUN: The contract.

7 PRESIDENT GIFFORD: I think there
8 was some other questions I think outside of
9 questions that the board had directed to Kym.

10 TRUSTEE THRUN: Oh, okay.

11 TRUSTEE EKSTROM: Because I had some
12 questions about the contract and he asked me
13 to wait.

14 TRUSTEE THRUN: I'll wait.

15 PRESIDENT GIFFORD: One thing we
16 can keep in mind here is, you know, the use of
17 Vehe Farm for Health World, I think, is the
18 overall cooperation between the communities
19 that we've been looking for. We've done this
20 for a number of years with sports activities,
21 with soccer and baseball where for a number of
22 years Deer Park residents were paying
23 out-of-town fees and now as we started
24 providing more and more practice fields and

1 ball fields with soccer or baseball, those
2 fees, extra fees have been dropped So I
3 think this is another way of overall community
4 participation of where now Health World if the
5 board deems so it's located in Deer Park and
6 now we're contributing to all of these other
7 communities by giving their children a place
8 to come, you know, and view the Health World
9 experience. So I think it all works in
10 cooperation between a number of communities
11 and enhances our position with a number of
12 other communities by supporting this.

13 TRUSTEE KIZIOR: You know, Pat, I
14 disagree. I really don't believe we need to
15 ask Health World to give any special
16 priority. I think it's going to be more of a
17 logistical nightmare to try and locate the
18 Deer Park residents versus anybody else. I
19 think the real benefit that accrues to Deer
20 Park is the fact that we actually do have
21 Health World here. We're getting people to
22 see the facility. We're getting a lot of foot
23 traffic. We're building up what I would call
24 good will within this community and other
