THE BLICK INSURANCE AGENT.

Miss Up-to-Date Method That Wins Every Time. The modern insurance agent has a sort of palatial method of extracting a policy. Here is one that works where a good many others fail. Jones is an insurance agent and he meets Brown, who abhors solicitors of all kinds. Says Jones: "You are not looking well these days, Brown." "That so? I didn't know it. What's the matter with me?" "Well, you seem to be off color and under weight. I don't believe you could pass an examination for insurance."

"WHACKS"

When Old Mother Nature gives you a "whack" remember there's a reason," so try and say "thank you," then set about finding what you have done to demand the "whack," and try and get back into line, for that's the happy place after all. Curious how many highly organized people fail to appreciate and heed this little, gentle "whacks" of the good old Dame, but go right along with the habit whatever it may be, that causes her disapproval. Whiskey, Tobacco, Coffee, Tea or other unnatural treatment of the body, until serious illness sets in or some chronic disease. Some people seem to get on very well with those things for a while, and Mother Nature apparently cares but little what they do. Perhaps she has no particular plans for them and thinks it little use to waste time in their training. There are people, however, who seem to be selected by Nature to "do things." The old Mother expects them to carry out some department of her great work. A portion of these selected ones off and again seek to stimulate and then desecrate the tool (the body) by some one or more of the drugs—Whiskey, Tobacco, Coffee, Tea, Morphine, etc. You know all of these throw down the same class of analysis, the chemical analysis. They mutilate and then depress. They take from man or woman the power to do his or her best work. After these people have drugged for a time, they get a hint, or mild "whack" to remind them that they have work to do, a mission to perform, and should be about the business, but are loafing along the wayside and become unfitted for the same and for the work that waits for them. They get stuck to the course and keep the body clear of obstructions so it can carry out the behests of the mind. Silliness is a call for an up-lifter. These hints come in various forms. It may be stomach trouble or bowels, heat, eyes, kidneys or general nervous prostration. When the "whack" comes it's a warning to quit some abuse and do the right and fair thing with the body. Perhaps you are loafing, thinking that offends. That is one of the greatest causes of human disorder among Americans. Now, then, if Mother Nature is gentle with you and only gives light, little "whacks" at first to attract attention, don't abuse her consideration, or she will soon hit you with a harder whack. And you may be sure she will hit you very, very hard if you insist on following the way you have been going. It seems hard work to give up a habit, and we try all sorts of plans to charge our ill feelings to some other cause than the habit. Coffee drinkers when ill will attribute the trouble to bad food, malaria, overwork and what not. They gradually get worse until they are finally forced to quit entirely, even the "only one cup a day." Then they begin to get better, and you may say they have gone on enough to set up some fixed organic disease, they generally get entirely well. It is easy to quit coffee at one end for all, by having well made Postum, with its rich, deep green color which makes it so beautiful golden and the crisp snap of good, mild Java is long enough to fix it out. It pays to be well and happy for good old Mother Nature then sends us her blessings of many and various kinds and helps us to gain fame and fortune. Strip off the handicaps, leave out the deadening habits, let Mother Nature's hints, quit a lesser and become a winner. She will help you sure if you quit the things that keep you back. "There's a reason" and a profound one. Look in each package for a copy of the famous little book, "The Road to Wellville."
