LAKE ZURICH, ILLINOIS

If you wish to learn regarding installation of gas or of any gas appliance particularly the new Cottage Arc Light, or desire any information or require our services in connection with the use of gas, a postal or telephone message to
Northwestern Gas Light & Coke Co.
1611 Be son Ave., EVANSTON, Tel. 89
Ashland Avenue, DES PLAINES, Tel. 10
will receive prompt attention or bring our representative to your door.

Season Opening
I wish to announce the opening for the season of 1912 of my ice cream parlor which will be on Saturday, April 27. The best of everything in this line will be served and served in a clean and sanitary manner. I wish to impress upon you the fact that my parlor was the first, and is now the only place where everything is served in sanitary dishes. The cups and cone holders are dust-proof and so arranged that it is impossible for anybody's hands to come in contact with the inside of the cups or cones. I also have a sanitary straw dispenser. Glib's Special Ice Cream will be served and you all know of the quality and pureness of this cream.
F. O. STONE
I CATER TO PARTICULAR PEOPLE

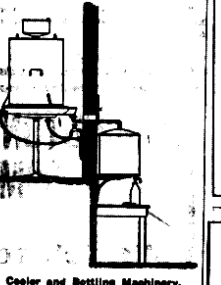

Hot From the Oven
one of our rib roasts would tempt a stone image to eat. Its fragrance acts like a tonic. And once you get your teeth into it you'll stop eating only when you can eat no more.
Our Roast Beef
is good cold as well as hot. Fine for lunch-
on or on and especially good for sandwiches. Try the best and you'll know we could justly praise it more.
Alverson & Groff

He Never Will Understand

Mrs. Bruce put down the letter in a flutter of excitement. Her face was flushed with pleasure and her eyes sparkled with anticipation. She hurried to the telephone, but just as she laid her hand on the receiver she changed her mind.
"No, I'll have the fun of telling Dick face to face," she said to herself.
The thought of his surprise and delight quickened her feet on the stairs as she ran to her room to dress for the street. All the way downtown she pictured her husband's amazement and pleasure in the news she had for him. She determined to make him guess a few times before she told him.
It was with some difficulty that she modified the illumination of her beam when she entered her husband's office. He must not suspect at first that she was the bearer of such good tidings. As it happened, he was busy telephoning when she approached his desk and he merely nodded as she sank into a chair by his side. He had therefore plenty of time to compose her features. So it was with quite a successfully grave face that she greeted him when he finally ceased his telephonic conversation.
"Well, dear?" he began. At the same instant the telephone bell began also, and in another second he was deeply engrossed in a conversation that to Mrs. Bruce seemed to have lasted fully ten minutes.
"Dick! I came down to—" she said when at last he hung up the receiver.
"That was a chance to do the great Amalgamated company a little favor," he said smilingly to Mrs. Bruce. But before his hand had left the receiver he changed his mind and took it down again. Then followed a long and diplomatic appeal to Hardwick. Mrs. Bruce sat through it patiently, buoyed up by the thought of the perfectly delightful surprise she still had in store for her husband.
Once more the receiver was hung up on its hook and Bruce, swinging around in his chair, said, "Going shopping, Lucy?"
"No, Dick, I came down especially to tell you—" Then the loud ring of the telephone drowned her voice.
"Hello. Yes. Oh, Mr. Rothchild! Very glad to hear from you. Why, yes, I think so. No trouble at all. I have the whole project mapped out here in my desk. Yes, if you wish, I can read off the main points for you."
Bruce drew a thick package of papers from a pigeon hole and began to read slowly and carefully numerous paragraphs and long lists of figures. Mrs. Bruce gave his back a despairing glance. Edgated for ten minutes and then, rising quietly, slipped out of the office.
Half an hour later she called up her husband on the telephone from a dry goods store. Somewhat to her surprise the line was not busy and she got the connection at once.
"Is this you, Dick?"
"Yes, Lucy. Where in the world did you disappear to? I was dumfounded when I turned around a minute ago to find you gone. Why didn't you wait?"
"Because I came downtown purposefully to tell you something. I got a letter from Mrs. Morse today. She says that she and Mr. Morse are going to California in their private car, week after next and they want to go with them. Mr. Morse thinks that will give you a chance to visit the San Francisco agency. He's going to write you or call you up on the long distance, but Mrs. Morse said she couldn't wait to tell me of the plan."
"Phew!" said Bruce. "But, Lucy, why in the world didn't you tell me this when you were in the office?" He takes my breath away. I don't see how you could have it to yourself all the time you were over here."
"Don't you, really?" returned Mrs. Bruce, laughing.
When he found that she had broken the connection Bruce said to himself, "Well, if I live to be a hundred and seven, I'll never understand women."

TO PRODUCE CERTIFIED MILK

By C. R. LANE.
For the production of certified milk, the barnyard should be free from manure and well drained, so that it may be kept free from stagnant water. The manure, which collects each day, should not be piled close to the barn, but should be taken several hundred feet away.
If these rules are observed not only will the barnyard be free from objectionable smell, which is an injury to the milk, but the number of flies in summer will be considerably diminished.
In the stable cleanliness must be strictly observed. The stables should be well ventilated, lighted and drained and should have tight floors, preferably of cement, never of dirt.
They should be whitewashed inside at least twice a year, unless the walls are painted or smooth cement finish, which can be washed frequently.
The air should always be fresh and without bad odor. A sufficient number of lanterns should be provided to enable the necessary work to be properly done during the dark hours.
The manure should be removed twice daily, except when the cows are outside in the fields the entire time between the morning and afternoon milkings. The manure gutter must be kept in a sanitary condition.
All sweeping must be finished before the grooming of the cows begins, so that the air may be free from dust at the time of milking.
Remove the milk from each cow from the stable immediately after it is obtained to a clean room and strain through a sterilized strainer of cheesecloth and absorbent cotton, which should be washed frequently.
The rapid cooling is a matter of great importance. The milk should be cooled to 55 degrees F. within an hour, but not allowed to rise above that as long as it is in the hands of professor or dealer.
In order to assist in the rapid cooling, bottles should be cold before the milk is put into them.
All utensils should be as simple in construction as possible, and so made that they may be thoroughly sterilized before each use.
Coolers, if used, should be sterilized in a closed sterilizer, unless a very

Cooler and Bottling Machinery.
High temperature can be obtained by the steam sent through them.
Bottling machines should be made entirely of metal with no rubber about them, and should be sterilized in the closed sterilizer before each milking or bottling.
Bottles should be of the kind known as "common sense," and capped with a sterilized paraffined paper disk, and the caps authorized by the commission.
All dairy utensils, including the bottles, must be thoroughly cleaned and sterilized.

DAIRY NOTES

Expand your feed supply with a silo.
Economy in feeding the dairy cow never plucks the silo.
The silo lends itself admirably to efforts at intensive farming.
Oil meal or cottonseed meal and ensilage is practically as good.
Nothing is better than corn meal to bolster up the silage's skim milk.
Alfalfa and ensilage make a nearly perfect ration. Corn and ensilage is best.
Skim milk is less digestible than whole milk. The safety lies in light feeding.
Feeding eggs has been found an ideal side job for the creamery when properly regulated.
Typically all cases of difficult calving can be readily overcome by the use of benzoin.
Nothing ever came so near turning December into June for dairy cattle and sheep as the silo.
The length of the stall should be adjusted by the size of the cow, and always used by the same cow.
Probably the most profitable source of milk is the cow that has been milked and consumed in the milk house.
The way to cure that milk in the period the more from the cow during the winter.

HER LUCK NOT ALL DESERVED

Printed Prayer Responsible for Return of Pocketbook Only There by Accident.
She had been paying visits most of the afternoon, and on reaching home and putting away her wraps she discovered that her cardcase was missing. In it had been a dollar or two, her cards and a certified check for \$200 which she had intended to deposit, but had been too late for her bank.
"Heavens," she exclaimed, "shall I ever see it again?" and sat down in her despair to think over everywhere she had been and might have left it. Suddenly the telephone bell rang.
"Are you Miss Blank, and have you lost anything?" inquired the person at the other end.
"Yes; I have just discovered the loss of my cardcase."
"What was in it?" said the voice.
"My cards, some money, a certified check for \$200, and, oh, yes, a little prayer on a slip of paper. Did you see that?"
"Yes," said the voice; "I picked the case up. And just let me tell you that it was that prayer that has brought your property back to you."
The cardcase owner heaved a sigh of relief and thought how lucky it was for her that a Catholic friend had slipped the little printed prayer into her cardcase last summer.

Her Sister.
Alice—What kind of a girl has Jack engaged himself to? Rose—Oh, she's the sort of woman you never dare ask to luncheon for fear she'll stay 'til dinner.—Harper's Bazar.
Natural Perversity.
Why is it that the people who don't know right from wrong seem to always be in the wrong?—Exchange.

The Rothschilds.
What chiefly struck one at the funeral of the late Baron Gustave de Rothschild was the great multiplicity of relatives descended from his father, the first Baron James, the shrewdest and most successful business member of the Paris branch of the Rothschilds, that he founded. Among these descendants were a son, Grandsons, and great-grandsons, including: Rothschild, Lauberts, Loontjens, Barmine, Sterns, Sassoons, Gubbays. They represented not only the principle of blood relationship, but the finance of Paris, Brussels, Genoa, Milan, Odessa, Bombay and Calcutta. Among the numerous multi-millionaires descended from the first Baron James there was one who devoted himself to medical science, dramatic literature and the collection of autographs of great writers.—Baron Henri, only son of the second Baron James.

BARKER'S Cough Remedy
Is the medicine for COUGHS, COLDS and BRONCHITIS. All dealers.

Electric Bitters
Succeed when everything else fails. In nervous prostration and female weakness they are the supreme remedy, as thousands have testified. **FOR KIDNEY, LIVER AND STOMACH TROUBLE** it is the best medicine ever sold over a druggist's counter.
