**To Every Man**

experienced in the use of a silo, our IMPERISHABLE SILO strongly recommends itself. Made from vitrified clay, it stands to reason that it can never crumble or decay. Neither will it shrink, swell or absorb moisture from the ensilage. All forms of concrete will absorb moisture which will cause the ensilage to spoil more or less next to the wall. A well re-inforced concrete silo will cost as much or more than our "IMPERISHABLE". Our silo is given immense extra strength by use of a patent channel block in which steel bars are buried in mortar, protected from air and concealed from view. This form of construction is used in grain tanks 100 feet high. Customers are protected by a warranty.
