thumb.

Not on the th#mb!" Mrs. Temple cried. "Don't you know?" You see, it's my first marriage." "You see, it's my first marriage." And "You poor boy-this fingest!" And Mrs. Temple, rating Marjorie's impaired the cried the proper diet, and had died the cried the proper diet, and had died the cried to make the fatal circlet home. And then Mrs. Temple, having completed their installation as man and wife, utterly confounded their confusion by her final effort at comfort: Well, my dears, I'll go back to my seat, and leave you alone with your dear husband." "My dear what." Marjorie mumbled inanely, and began to snife aguin. Whereupen Mrs. Temple resigned her Voleruppen Mrs. Temple resigned her to fate the confusion of the property of the property of the property of the confusion of the property of the prope

to Mallory, and consigned her to rate with a constoling platitude:

"Cheer up, my dear, you'll be all right in the morning."

Marjorie and Mallory's eyes met in one wild clash, and then both stared into the window, and did not notice that the shades were down, that the shades were down.

CHAPTER XI.

CHAPTER XI.

A Chance Encounter.

While Mrx. Temple was condiding to her husband that the agitated couple in the next seat had just come from a wedding-factory, and had got on while he was lout in tobacco land, the people in the seat on the other side of them were engaged in a little drams of their own.

Ira Lathrop, known to all who knew him as a woman-lating snapping-turbing as a woman-lating snapping-turbing with the seal of the seal

with a control of the control of the

"I came from there originally."

"50 did I," said Ira Lathrop, leaning bloser, and beaming like a big sun; "I don't suppose you remember the Lathrop?"

sun; "I don't suppose you remember like Lathrop;"
The old maid stared at the backsion as if she were trying to see the boy she had known, through the main time had modeled on his face. And then she was a girl again, and her voice chimed as she cried:

"Why, Iral—Mr. | Lathrop!—is it rour?

votes chimed as she cried:

Caponizing is profitable

Range for the chicks is best.

Sheep must have some shelter. Separate the pullets and cocker

Some cows are better bred than heir owners.

Do not put the colts in enced by barbed wire.

Do you have a lot of you ers? Sell them for frys.

It's a mighty easy matter rowd the chick coops now. It may be wise to protect from the flies during the day

You cannot fatten your cattle ticks are sucking their blood.

Hill culture produces earlier straw berries than matted row culture. Unless a man has a great love fo a horse he should not handle coits.

Roughness cannot be made to en-tirely take the piace of grain, but a heavy crop of roughness is not to be despised.

Ground limestone is preferable to burnt lime unless two tons of the for-mer cost considerably more than one ton of the latter.

There are very few farms on which additional labor expended in prepar-ing the seed bed would not yield handsome returns.

A wide range and frequent ex-change of pasture will reduce the ravages of the stomach worm, that fearful enemy of the sheep.

An enterprising farmer living bear a town of 5,000 or more can sell every pound of his butter at full retail prices or little above the year round.

The man who is trying to raise hog without pasture and forage crops i like a puppy chasing his tail. He set plenty of exercise, but nothing else.

If horses are inclined to nab at each other between the stalls, put up some tight wire as a partition. They can see through this all right and still not reach each other.

The first incubators used in the United States were tested in 1875. Now thousand are in use in every state in the United and wonderful progress has been made. In fact, without the use of licelators and brooders, the hig commercial plants of today would be impossible.

Any soil that turns blue aper pink needs lime. librou haven't a hog he build one next fall.

Experts say that topping corn ma erially reduces the yield.

Plenty of good loose dirt should be allowed the molting hens. The manners of the sorse us reveal the temper of his owner.

Turkeys need a wide range. The to not do well confined to rarda. Every day you keep the lambs after they are big enough to go is a loss.

Caponizing is another job the farm er neglects—and thereby loses money

Water the horse before you give him hay. Hay before grain, concentrates last.

Good feed will put life into a horse i hundred times better than an 8-foot whip.

Pasture and exercise develops a strong frame in all kinds of young stock.

Rye may be sown in the fall and used as a late fall and early spring pasture.

Stubble that cannot be stirred this fall should be disked to conserve the

Don't be in any hurry about wean-ing the helfers you will add to the lairy herd. It is well to remember that ducks need plenty of cool shade during the hot months.

Live stock furnishes mahure and converts forage crops into market-able products:

The green straw pile is not infre-uently the sign of a green hand man-ging the separator.

Keep up the supply of oyster sheft. The lime in it is an essential article in the production of eggs. It pays to grade melons, and to market them in the large now growing in popularity.

No land is so rich that its owner can afford to waste the manure that is made by his farm stock.

In this hunt for the profit dollar, keep an eye on the combination of en-silage and clover or alfalfa hay.

The foundation for a silo made of concrete and properly reinforced need not be more than twelve inches thick.

The most profitable way of market-ing grain and fodder is through stock. They produce manure, which is very recessary to the soil. As a rule, sons of great producing cows are more liable to beget large producing daughters than are great producing cows themselves.

The cow that comes in fresh next month is just about the most profit-able one of the whole year and dairy-men are beginning to find it out.

A common error of the experienced feeder is failure to provide good shelter. Lambs can not make good gains with wet feet, or soggy fleeces.

It is addisable to place a box of grit or course sand where the turkers can find it, as not all farms have sufficient quantity for the purpose of good di-gestion.

The failures in positry culture are no more common than any other commercial activities, and are usually traceable to a want of proper knowledge of its requirements.

He sure that the roceting quarters are well ventilated at this time of the year. Pure air is free and insepensive and will enter every nook and corner of the ispuilty house, if it is permitted. It is one of the very especially designed to the corner of the interest of t
