100 W. Main Street, Barrington, Ill.

WHEN your physican writes a prescription he specifies exactly what drugs he wants and the amount of each ingredient. But the problem of compounding these ingredients so that the best results are obtained—that is left to the pharmacist siudgment.

How important it is then, to choose your pharmacist with care and take the prescription to one who is properly qualified by law; the prescription, and by experience to perform this important task. For all the accumulated knowledge brought to bear by your doctor in writing the prescription may go for naught unless the compounding is done in accordance with the most approved methods.

When your prescription is compounded by us

When your prescription is compounded by us you are assured of getting exactly what the doctor specifies. Furthermore, you are assured of having the prescription compounded properly by an experienced pharmacist with the very best grade of materials obtainable.
