Property Owners Ask for Widening of Dundee Avenue

Seek 30 Foot Pavement; Map Reveals Width Shortage in Two Blocks

A petition for widening Dundee avenue from the south side of Main street to Hillside avenue was presented to the village board at its meeting Monday evening. It was signed by 14 property owners on Dundee avenue.

The signers requested the village board to give assistance from either the state or county highway departments in widening the strip to 30 feet with curbing. The present width is 18 feet.

An examination of the village map revealed an error in the present street that might possibly affect any future developments. It shows that on the east side of Dundee avenue from Main to Lake street, there is only a 15.5 foot strip dedicated to the street while on the west side there is a 33 foot strip. From Lake street south on Dundee avenue a 33 foot strip is dedicated to the street from either side.

The error in laying the street and sidewalk is made noticeable by the bend in the road that occurs at the northeast side of the Lake Zurich intersection. A study of the signatures on the petition shows that no property owners on the east side of Dundee avenue between Main and Lake signed. It could not be learned if all of them were approached or not.

In making the request, it was also pointed out that assistance might be received from the fund credited to the village from the state gas tax. This fund, trustees pointed out, is not sufficient to complete that job, which was estimated to cost approximately \$30,000.

The matter was turned over to Rudolph Berg, chairman of the street committee, for study. It was suggested by Trustee John Carroll that if the project were successful, the paving might be extended to join route 63 at the village line north.
