**Suburban Building in April Sets New Four Million High**

Suburban building in April amounted to a new high figure in surprising proportions, the total volume of permits issued by fifty-eight communities amounting to \$4,424,193—the first four million dollar figure since 1929. It exceeds March, which had \$3,668,785, by 21 per cent and April of last year, with \$3,109,346, by 42 per cent. The improvement in March of last year established 1936 to double the figure of 1935. Even this hardly warranted any expectation of months this spring averaging \$4,000,000 each.

The low year of the depression in the building industry, as in others, was 1933, and the worst month of that year was March, in which this survey recorded suburban building amounting to only \$198,324. Simple division shows that suburban building activities are now 22 times as great as they were then. And, March 1932, had as it was, was only a little worse than several other months of that year for the average of the year was only \$345,000 per month. The average thus far this year is \$2,567,000 per month or eight times as much. And this includes the seasonally poor months of January and February, while it seems evident that a number of months equally as good as or better than April are yet to come.

In both March and April new building in the Chicago suburban area exceeded that in the city itself, though this was not true of January and February. The figures for the year thus far may be compared as follows:

Chicago 68 Sub. Commun.	January	\$1,951,975	\$1,526,770
	February	2,323,310	1,859,063
	March	3,119,224	2,466,250
	April	3,225,095	4,424,193
Totals	\$9,920,504	11,506,293	

The fine homes being constructed account for the larger volume of building outside the city limits and in tributary territory. For homes outside of the city limits and in tributary territory. For homes outside of the city limits and in tributary territory.

	March	3,119,224	2,466,250
	April	3,225,095	4,424,193
Totals	\$9,920,504	11,506,293	

The fine homes being constructed account for the larger volume of building outside the city limits and in tributary territory. For homes outside of the city limits and in tributary territory.

building factor in the suburban region, making more than one-half of the total. The commissioners report 311 new homes with a value of \$2,415,704. This is by far the largest number of homes and the greatest value in any month for more than a year. Last year the average per month was 116 and the value \$1,044,000. The fact should be noted however that the value per home has dropped greatly. It is now only \$7747, while in January it was \$1945. February \$12,544 and March \$9583. Many more homes are being built but at a lower cost per unit.

Details of the survey are as follows:

Barrington	April '37	April '36
Crystal Lake	\$ 24,750	\$ 10,125
Des Plaines	12,100	1,050
Elgin	190,475	129,250
Highland Park	318,431	193,778
LaGrange	71,275	25,050
Lake Forest	61,863	47,575
Libertyville	1,259	3,000
Maywood	232,250	52,700
Meireose Park	450	625
Mt. Prospect	31,950	925
Niles Center	5,950	4,000
Oak Park	119,430	75,800
Park Ridge	19,530	24,000
St. Charles	15,700	13,565
Waukegan	65,337	73,300

Former Names of Atlantic In 1836 the site of Atlantic, Georgia, was chosen as the southern terminus of a state railroad and was named Terminus. In 1852, the name was changed to Mariettaville and in 1867 to Atlanta.

**"FEELS GRAND TO BE OUT OF THE 'ALL THREE' CLASS!"**

MY 117-INCH WHEELBASE NASH COST ME ONLY A FEW DOLLARS MORE THAN THOSE SMALLER CARS!"

Before you make any decisions... read this experience of Mr. Harry V. Kogel

"Remember the old saying, 'What you don't know—won't hurt you?' Well, the Elgin Nash I didn't know much I wanted a big car until I got one. The way my Nash LaGrange gets away in traffic, the way it just hums along the road... the extra room in it... the independent, luxurious 'feel' of it—it's hard for me to suppress just how pleased I am. Elgin, my, it feels grand to be out of the 'All Three' class!"

**THERE IS NOTHING LIKE IT in the WORLD**

For years engineers in research laboratories labored to perfect dry cleaning. Materials were gathered from far away corners of the earth; all were tested, most were discarded. The best minds and the complete knowledge of science all were marshalled to produce the perfect method.

Finally the chemists said: "We have a super-cleansing fluid that is fire-proof and explosion-proof—most efficient cleansing fluid in the world. Because it so readily vaporizes, clothes can be cleaned perfectly by the gentlest method known—eliminating the wear and tear necessary when cleaning and drying with gasoline and naphtha. This fluid leaves absolutely no odor. There is nothing like it in the world."
