

Delivers Talk on Christian Science at Public School

Francis Lyster Jandron, C.S.B. of Detroit, Mich., member of the Board of Lecturers of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., delivered a lecture, "Christian Science Reveals God's Ever-Presence," at the public school auditorium Thursday evening under the auspices of the First Church of Christ, Scientist, Barrington.

The lecturer spoke in part as follows: Christian Science enables us to prove that God is ever present with man. God directs, shelters and sustains him throughout a never-ending life. Every one of us is free to understand the divine relationship which exists between God and man, and to realize too soon to become conscious of it. This spiritual understanding banishes fear and uncertainty, sickness and sin. The Old Testament tells us that Enoch "saw God," and escaped the experience of death. The greatest freedom you can never know comes with the inspired assurance that God is present. Christian Science teaches the importance and the unfailing power of God's ever-presence, and it makes clear how it can be put into practice. Those who follow its teaching gratefully acknowledge the improved health, conscious harmony, and joyful holiness which a closer acquaintance with God has brought to their lives. In his study of Christian Science, the Christian Scientist accepts the Bible without reservation. Christian Scientists are convinced that daily study of the Bible helps them to draw nearer to God. They have found that the Bible is a book which is not merely to be revered, but one which can be used in very practical and beneficial ways. Christian Science unlocks the treasures of the Scriptures and reveals their spiritual significance. The divine inspiration which illumines the Bible pages can be shared by all who seek it humbly, regardless of differences of age, place, or race. It speaks a universal language, and proclaims a healing message which brightens the depths of human hearts with gleams of divine radiance and power.

The Bible records the progressive unfolding of humanity's understanding of God. It contains the history of the ebb and flow of the spiritual progress of mankind. It tells of the unselfed power which accompanies obedience to God, and of the unhappy experiences which follow disregard of spiritual guidance. The Bible is not a textbook of geology or biology, to be outmoded and outgrown as new theories and discoveries come to light. While physical science is based on human reason and the testimony of the material senses, spiritual sense alone can testify of God's spiritual universe and of man's relationship to his heavenly Father. Physical science misses the glorious realm of real manhood when it seeks cause and effect in matter and shuts God out of His own universe. In the Christian Science textbook, "Science and Health with Key to the Scriptures," Mary Baker Eddy has written (p. 209): "Spiritual sense is a conscious, constant capacity to understand God. Science and Health contains

the Science of Christianity. It reveals the infinite divine Principle by which good becomes available to man. It explains the method and practice of Christ Jesus' teachings. No impostor could have written Science and Health. No book not in accord with the revealed truth of the Bible could have withstood the tests of application, demonstration, criticism, and hostility to which Science and Health has been subjected since it was first published sixty years ago. Thousands have been healed by reading it.

Wind Changes Scene's Color The fohn is one of the best known winds in Switzerland. It is estimated to blow for 17 days in spring, 5 days in summer and 10 days in autumn. During its prevalence the mountains appear dark blue, with sharp outlines, and the forests at black. The fohn is a warm wind. It often brings fine weather for several days, but a sudden change must always be expected.
